DETAILED ACTION

The amendment dated 8/6/03 has been entered.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a process for mechanical decontamination of radioactive contaminated surfaces, classified in class 299, subclass 18.
 - II. Claims 4,6-11,13-15,17-20, drawn to a device for mechanical decontamination, classified in class 299, subclass 64.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process does not require an apparatus with several chambers, and each striking tool connected to each chamber. Furthermore, the apparatus can be used for work on non-radioactive surfaces (e.g. lead paint).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3673

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
